-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 11 and 13. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

Page 2, lines 1-3, the reference numbers of prior art, fig. 1, do not match the numbers in fig. 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2831

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Bruser et al. (US 4,688,969).

Regarding claim 1, Bruser et al. discloses a ground rod (fig. 2) having a first end (by 20 in fig. 1), a shaft portion (32) and a second end (by 20 in fig. 2) said first end having a pointed auger portion (22); the second portion having a tip portion (fig. 2) adapted to mate with an electric rotating powered driver. **Note** that it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re. Hutchison*, 69 USPQ 138.

Regarding claim 2, Bruser et al. disclose the ground rod claimed in claim 1 wherein said second end is faceted (fig. 2).

Regarding claim 3, Bruser et al. disclose the ground rod claimed in claim 1 wherein said second end has a square recess (col. 2, lines 35-37) adapted to receive a standard socket drive. **Note** that it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re. Hutchison*, 69 USPQ 138.

Regarding claim 4, Bruser et al. disclose the ground rod claimed in claim 1 having a second end also adapted to attach to a handle to permit manual insertion and removal of said ground rod. **Note** that it has been held that the recitation that an

Art Unit: 2831

element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re. Hutchison*, 69 USPQ 138.

Regarding claim 5, Bruser et al. disclose the ground rod claimed in claim 1 driven partially into the ground and attached to an electrical system of a building (col. 1, lines 13-17).

Regarding claim 6, Bruser et al. disclose the ground rod claimed in claim 1 attached to an electric threader (col. 1, lines 13-17).

Regarding claim 7, Bruser et al. disclose a temporary ground rod (fig. 2) comprising a first end (by 22 in fig. 1) and a second end (by 20 in fig. 1) connected together by a shaft (32): said first end comprising an auger (22) fixed to said shaft (figs. 1, 2); the second end comprising a head portion (underneath 20) adapted to connect to and be driven by a wrench; and a handle (14) removably attachable (attached by coupler 20) to said head portion. **Note** that it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re. Hutchison*, 69 USPQ 138.

Regarding claim 8, Bruser et al. disclose the ground rod claimed in claim 7 wherein said second end is faceted (fig. 2).

Regarding claim 9, Bruser et al. disclose the ground rod claimed in claim 7 wherein said second end has a rectangular recess adapted to receive a standard drive (col. 2, lines 35-37). **Note** that it has been held that the recitation that an element is

Art Unit: 2831

"adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re. Hutchison*, 69 USPQ 138.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Orsini et al. (US Application 2003/0192713 A1) disclose a grounding electrode. Fowler et al. (US 6,677,517 B2) disclose a lightning system. Kies (US 4,577,053) discloses a ground rod. Farmer (US 4,626,330) discloses an anode. Beggs (US 6,040,522) discloses an electrically grounded land. Naef (US 2,449,313) discloses a ground rod. Matthews (US 2,270,325) discloses a ground rod. Heinrich (US 2,065,184) discloses a ground rod.
